

## Full Project List

Foodservice Resources is a complete foodservice design and operations management-consulting firm providing professional services to architects, developers, administrators, foodservice managers and business owners. In today's competitive business climate, foodservice owners and operators are faced with a variety of problems that range from ill-conceived kitchen layouts to ineffective product marketing and Foodservice Resources has the experience and expertise to address a wide range of both design and operational issues.

Our professional staff can help identify areas of concern, and by working in tandem with our clients, develop and execute strategies for improvement.

Foodservice Resources provides advice and counseling in two primary areas: food facilities design and operations management consulting. We view each project without pre-conceived notions and address each client's needs independently. We act as a catalyst for original concepts and ideas that range from new and improved equipment selections that can save money through increased efficiency, to menu concepts that reflect the latest trends in the food and beverage industry.

We also provide foodservice-related support to business, industry, and government to assist in the correct evaluation and operation of food and beverage properties.

Below is a partial list of the types of clients and projects served by our professional staff. A detailed project list complete with references as well as samples of our work is available upon request.

- |                                  |                                |
|----------------------------------|--------------------------------|
| Airports                         | Government Agencies            |

| Franchise Organizations          |                                |

## **Firm Qualifications and Project Experience**

Since its inception in 1989, Foodservice Resources has provided professional foodservice facility design and operations management consulting services to a wide range of clients including sports and other public accommodation facilities, restaurants, corporate dining operations, healthcare facilities, hospitality, schools and colleges.

A consortium approach to our consulting practice provides our clients with a full range of foodservice consulting services and a project team tailored to the needs of a specific assignment. Principals John DePaola and Jeff D'Italia each have over twenty-five (25) years of foodservice design and consulting experience and have participated in hundreds of projects in all areas of commercial and on-site foodservice.

Our foodservice design work (for both new construction and renovation), as well as facility project consulting experience includes:
